

File sharing that is secure, reliable and easy to use

What is Single Wrench?

Single Wrench is a file sharing solution that is secure, reliable and easy to use. With no software to install or maintain, Single Wrench requires only a web browser and works on all operating systems. Whether you need to send or receive files, Single Wrench has an extensive feature set that makes it the perfect file sharing solution for your business.

Why use Single Wrench?

There are several ways that businesses can share files, each with its own set of drawbacks. **Email attachments** are limited by size, often blocked by corporate firewalls and suffer from a lack of security. **FTP** has similar security weaknesses, requires ongoing maintenance and is difficult for users to understand. Finally, **burning DVDs or other media** is expensive, time-consuming and requires the use of couriers to ultimately deliver the files. Single Wrench addresses these shortcomings with one comprehensive file sharing solution.

Is Single Wrench the right solution for my business?

Single Wrench was designed with a feature set to ensure it meets the needs of businesses of any size. We offer three different editions – Personal, Group and Enterprise.

SINGLE WRENCH PERSONAL

Single Wrench Personal Edition is for businesses that require a single user account. This edition forms the basis for our other editions and provides the core file sharing functionality of Single Wrench.

SINGLE WRENCH GROUP

Single Wrench Group Edition is for businesses that require multiple user accounts, managed by a single administrator. Each user has their own Personal Edition account, with the administrator retaining full access and control of all accounts.

SINGLE WRENCH ENTERPRISE

Single Wrench Enterprise Edition is for businesses that require multiple user accounts, managed by multiple administrators. Each group of users has their own Group Edition account, with the administrator retaining full access and control of all accounts.

Give it a try!
